

SPoke TEMPLATE - CUT OUT

① Fold your coloured or black paper in half and lay the straight edge against fold.

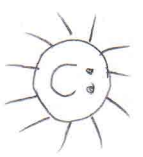

② Draw around template

③ Cut out → you need six in all.

④ Glue each spoke to the next. A glue stick is fine but double sided tape may work a little better.

⑤ If you are making the black spinner cut out the rainbow strips and glue to each spoke. Try to put in the same position on each spoke.

⑥ Thread cotton through the middle (fishing line works a little better!)
↙ there should be a gap

⑦ I tied a bead to each end of the cotton → makes it easy to hold and stops the cotton coming out.

⑧ Hold the thread taut + blow → not too much or you will get dizzy!

⑨ leave me a comment if you run into problems.
